EVENT-2

Topic entitled: Career Opportunities for Student option for study abroad. by Mrs. Trisha Mishra (GLOBAL RACH).

Department of civil engineering organised the seminar on 22-03-2023 .The objective of seminar to enhance the students understanding for carrier opportunities after four years of Graduation and how to find job or career and higher study in other countries. Speaker explained its benefits and advantages for career and discussed about various examples of different country Education policy, Internship and Training program for students. In this program Head of department and faculty members and students of different department were present in this program.

There are few experiences that are as transformative to the development of a student as study abroad. A full immersion in another culture heightens ones cultural sensitivities and opens our minds to the complexity of the world. And, if that is not enough, study abroad increases the competitiveness of our students as they seek employment upon graduation.

-Chancellor Woodson
