

**Vision of the Institute**

To harness a leading world-class, professionally and socially responsible and high moral values."

world-class
professionally
socially responsible
high moral values"

Mission of the Institute

- To create an eco-system for the dissemination of technical knowledge, to achieve academic excellence.
- To develop students with creative skills and leadership qualities, to solve local and global challenges.
- To inculcate human values and ethics in students, to make them socially and environmentally responsible.

ALUMNI FEEDBACK FORM

Dear Alumni,

Department of _____ requires feedback from our Alumni Members to gauge whether the programs offered by our Department is sufficient in preparing the students to be a competent engineer for professional life after their graduation. We are grateful if you could spare some time to complete this survey.

The number that best describes your level of satisfaction at each question:

Strongly satisfied: 5, Satisfied: 4, No opinion: 3, Not Satisfied: 2

Essential Details of Alumni

Name of Alumni:

Father's Name:

Year of Passing:

Roll Number:

Course Number:

Midi-Id:

Present Organization:

Designation:

6. Indicate how well do you agree with vision and vision of the department.

Vision and Mission Statement of the Department	Degree of relevance			
	5	4	3	2
VISION :				
MISSION 1.				
MISSION 2.				
MISSION 3.				

7. Indicate how well do you agree with each Program-Outcomes POs as a predicted accomplishment for this programme.

Program Outcomes (POs)	Degree of relevance			
	5	4	3	2
PO 1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.				
PO 2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.				
PO 3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
