Department of Information Technology

Orientation Program

Program Objectives:-

The Department Orientation Program is designed to give all the necessary resources, knowledge, and support to the students to thrive in the environment.

The orientation program is an essential step in helping the students to settle in and feel at home in the department. It's a chance to meet your peers, get answers to your questions, and start building relationships that will support them throughout the time.

Our goal is to ensure that they feel confident and excited as they begin their new academic session with us. We encourage them to actively participate, ask questions, and take full advantage of the resources available.

Program Outcome:

- **Introduction to the Department:** The students will learn about the department's history, mission, and vision. They will get to know the core values that drive our work and the culture we strive to build.
- **Meet the Team:** The students will interact with the faculty and staff members of the department.
- **Academic and Research Overview:** Gain insights into the academic programs, courses, and research initiatives that define our department. Explore the various resources and facilities available to support your academic and professional growth.
- **Policies and Procedures:** Familiarize yourself with important departmental policies, guidelines, and procedures, ensuring a smooth and effective transition.
- **Opportunities for Involvement:** Discover the various opportunities available within the department, including clubs, student organizations, professional development workshops, and research projects.

- **Orientation schedule/timeline –** 20 September 2024, 10:00 AM onwards.
