INDUSTRIAL VISIT

to

Tata Consultancy Services (TCS), Lucknow

Date: 30 September 2026

Department: Information Technology

Submitted by:
Mr. Arvind Gautam

Date of Submission:
05/10/2026

1. INTRODUCTION

1.1 PURPOSE

An industrial visit to Tata Consultancy Services (TCS), Lucknow was organized to provide students with practical exposure to the professional Information Technology environment. The visit focused on Artificial Intelligence, emerging technologies, career opportunities, industry expectations and preparation for technical and HR interviews.

The visit was intended to bridge the gap between classroom learning and practical industry requirements. It also provided students with an opportunity to understand how technical knowledge, projects, communication, problem-solving and confidence contribute to career readiness.

1.2 TARGET AUDIENCE

The visit was organized for B.Tech third and fourth-year students of the Information Technology stream. The participating students were able to relate their academic learning to current industry practices and understand the skills expected from students preparing to enter the IT sector.

1.3 OVERVIEW

The industrial visit included an interaction and learning session centred on Artificial Intelligence and the changing technology landscape. The session also covered career development and practical guidance for preparing for technical and HR interviews.

- Understanding the role and applications of Artificial Intelligence in the IT industry.
- Learning about current technology trends and industry expectations.
- Understanding the skills required by IT organizations from fresh graduates.
- Receiving practical guidance for technical and HR interview preparation.
- Understanding effective strategies for campus placement preparation.
- Emphasising communication, problem-solving, confidence and continuous learning.

2. OBJECTIVES

- To provide students with exposure to the professional IT industry.
- To understand current applications and growing importance of Artificial Intelligence.
- To learn about emerging technologies and industry trends.
- To understand expectations from IT graduates in the workplace.
- To gain practical guidance for technical and HR interviews.
- To improve awareness of career and placement preparation strategies.

3. DETAILS OF THE PROGRAM

a) Program Schedule

- Date: 30th September 2026
- Venue: Tata Consultancy Services (TCS), Lucknow
- Duration: One day
- Participants: B.Tech third- and fourth-year students of Information Technology

Agenda:

- Industry interaction and orientation at the TCS premises.
- Session on Artificial Intelligence and emerging technologies.
- Discussion on industry expectations and career opportunities.
- Guidance on technical and HR interview preparation.
- Interaction and question-answer session with the visiting/industry professionals.
- Group photographs and completion of the industrial visit.

b) Participants

The attendance record documents participating students from IT3. The industrial visit was organized for B.Tech third- and fourth-year students during the 2026–27 academic session.

4. KEY HIGHLIGHTS

Major Activities:

- Industry Orientation: Students were introduced to the professional IT environment and the expectations of technology organizations.
- Artificial Intelligence Session: The interaction discussed the growing relevance of AI and its applications in the changing technology landscape.
- Career Guidance: Students received guidance on career preparation, placement readiness and skills required for entering the IT sector.
- Interview Preparation: Practical suggestions were shared for approaching technical and HR interviews, including the importance of fundamentals, projects, communication and confidence.
- Interactive Discussion: Students had the opportunity to ask questions and clarify doubts related to careers, interviews and technology.

Innovative / Learning Practices:

- Use of an interactive industry-oriented discussion to connect academic learning with real workplace expectations.
- Practical examples and career-oriented guidance related to Artificial Intelligence and interviews.

5. LEARNING OUTCOMES

The industrial visit provided the following learning outcomes:

- Students gained better awareness of the professional IT environment and workplace expectations.
- Students developed a clearer understanding of the role of Artificial Intelligence in the current technology ecosystem.
- The interaction highlighted the importance of strong programming and technical fundamentals.
- Students understood that projects and practical implementation strengthen their placement profile.
- Students received practical guidance on preparing for technical and HR interviews.
- The session emphasised communication, confidence, problem-solving and continuous learning.
- Students became more aware of the need to keep their technical knowledge updated with emerging technologies.

6. STUDENT FEEDBACK

The feedback received from students was generally positive, while responses also indicated areas where future industrial visits can be made more practical and engaging.

Students particularly valued:

- Exposure to the professional IT environment.
- Discussion on Artificial Intelligence and current technology trends.
- Guidance on technical and HR interviews.
- Career and placement-oriented advice.
- Importance given to projects and practical skills.
- Emphasis on communication, confidence and continuous learning.

The feedback also suggested that future visits could include more practical demonstrations, hands-on activities, longer interactive sessions and better arrangements for student comfort.

7. FEEDBACK ANALYSIS

The feedback analysis indicates a mixed but overall satisfactory response. The responses were stronger in the Good category than in Excellent, while Average/Satisfactory ratings were also significant. This reflects a useful visit with clear scope for improvement in practical exposure and interactivity.

Feedback Parameter	Excellent	Good	Average / Satisfactory
Overall learning experience	0	4	2
Relevance to academic curriculum	3	2	1
Understanding of current industry trends & technologies	1	2	3
Understanding of working in the IT industry	2	3	1

Table 1: Question-wise feedback distribution

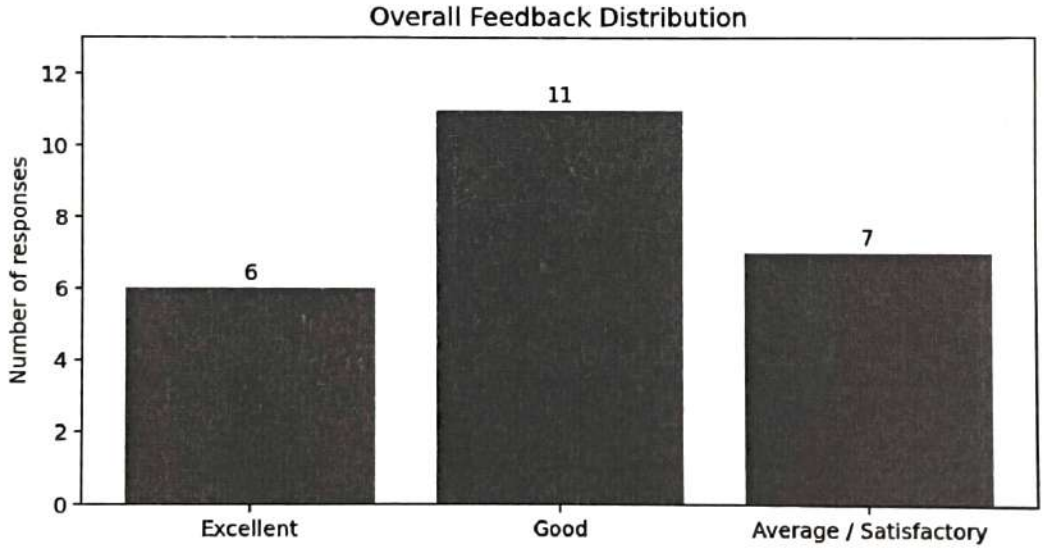

Figure 1: Overall feedback distribution

The feedback suggests that the visit was useful, but students would benefit from more practical demonstrations, interactive activities and deeper exposure to current AI and technology applications.

Student suggestions recorded in the submitted forms included:

- Provide refreshments during long industrial-visit sessions.
- Include more highlights on new technology trends and AI integration.
- Provide more hands-on activities and practical demonstrations.
- Include more practical exposure and interactive activities.

8. CONCLUSION

The industrial visit to Tata Consultancy Services (TCS), Lucknow was a useful and informative learning experience for the participating students. The visit provided exposure to the professional IT environment and helped students understand the growing importance of Artificial Intelligence and emerging technologies.

The career-oriented interaction and interview guidance were particularly relevant because they connected academic preparation with practical placement requirements. Students gained a clearer understanding of the importance of technical fundamentals, projects, problem-solving, communication, confidence and continuous learning.

Overall, the visit helped bridge the gap between classroom learning and industry expectations and encouraged students to prepare more systematically for their future careers in the technology sector.
